SEAL

### ABOUT NOWOCOAT

Nowocoat is a Danish coating plant with roots that go back to 1861. We are not afraid to call ourselves nerds when it comes to coating roofs and other surfaces of the house. We have only one thing on our minds: Making innovative and functional solutions adapted to all types of roofs, from the rainy north to the warm south. This will give you the best, most durable roofs over your heads – now, and in the future. Of course, we have also developed products that protect facades and tiles. Maybe that is why, today, we are Europe's leading producer of roof coatings.

### YOUR LOCAL SPECIALIST:

### YOU CAN PROTECT YOUR ENTIRE HOUSE!

Would you like to keep the facade of your house nice and clean in addition to your tiles? It looks great when the house is well maintained, and we also have the products to ensure that it does. It involves using the right cleaning agents and impregnations.

See what the options are on our website [www.nowocoat.dk](http://www.nowocoat.dk) and get your local professional specialist to come by and handle the preventive work needed to ensure a well-maintained house.

## UNIQUE WALL IMPREGNATION THAT PROTECTS AGAINST UNWANTED GRAFFITI

Nowocoat has developed a wall impregnation agent that allows you to remove graffiti using just cold water and high pressure. The treated surface can withstand at least 16 times cleaning. Therefore, it can be done without the need for cleaning agents and solvents, and the effect of the impregnation is, to all intents and purposes, as good as permanent.

Many municipalities, housing associations, institutions and companies will now be able to save significant sums on the removal of graffiti. Nowo Anti Graffiti Seal works by adding a transparent and almost invisible membrane to the surface, meaning that the paint from the graffiti cannot penetrate the wall itself. It will be confined to the outside of the membrane, and therefore it is easy and quick to wash away.

## REMOVING GRAFFITI BECOMES ALMOST EFFORTLESS - AND CHEAP

In comparison with other recognised anti-graffiti agents, Nowo Anti Graffiti Seal is unique in that the impregnation is long-lasting and close to being a permanent solution. Studies have shown and documented that the membrane can withstand at least 16 pressure washes with a pressure up to 100 bar before the wall needs to be impregnated again.

This results in significant economic, work-related and environmental benefits as the wall does not need to be re-impregnated virtually every time the graffiti is removed. For a long period, there will only be a need for fast, cheap and environmentally friendly pressure washing.

It can be applied to all walls made of concrete, eternite, brick, wood and metal. It can be applied using a brush, roller and professional spraying equipment, and the result is a transparent and almost invisible membrane that forms a waterproof and extremely strong barrier - which remains diffusion open so the wall can still breathe.

- **Unique wall impregnation**
- **Can withstand at least 16 pressure washes**
- **Breathable**
- **Cleaned with cold water**
- **Environmentally friendly cleaning**
- **Waterproof barrier**
